Project Name	Farm Management System
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	Yes
4	Database schema / seed files (if applicable)	Yes
5	Environment configuration file (.env.example or similar)	Yes
6	Deployed application URL (if hosted)	
7	APK / Executable binary (if applicable for mobile/desktop apps)	
8	Dockerfile / Containerization config (if	Yes
9	applicable) Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

```
Farm-Management-System/
│
├── frontend/
│   ├── src/
│   ├── public/
│   └── package.json
│
├── backend/
│   ├── controllers/
│   ├── routes/
│   ├── models/
│   ├── middleware/
│   ├── config/
│   ├── server.js
│   └── package.json
│
├── tests/
│
├── docs/
│
├── .env.example
├── README.md
```

└── package.json

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	**https://orgfarm-31ba9a8727-dev-ed.develop.lightning.force.com/lightning/o/Crop__c/list?filterName=__Recent**
Login Credentials (Demo)	sivasakthichitra2006@gmail.com 6hZ8JESR
Platform / Hosting Provider	salesforce/salesforce cloud
Repository Link	**https://github.com/sivasakthichitra2006-blip/salesforce-project**

Demo Video Link
https://drive.google.com/file/d/1ZCdD5FxljQ9u1dhEoEgBJtrw-GdGCE6m/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Clone the project repository from GitHub.

Install the required dependencies using npm install.

Configure the database connection and environment variables.

Start the backend server.

Start the frontend application.

Open the application in the browser using the provided localhost URL.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Application requires database connection to work properly.	Configure the database before running the application.

2	Application currently runs mainly in a local development environment.	Can be deployed to a cloud platform in future.
3	Advanced analytics and real-time monitoring may be limited.	Planned as future enhancement.
